

# Energy Savings Agreement

## Ounce of Prevention

Maintaining your HVAC equipment is the primary way to maximize the efficiency of your system.

Your system could last up to **twice as long**. It's like getting two air conditioners and two furnaces for the price of one. The annual service you receive as part of your membership could double the remaining life of your air conditioner and furnace.

1

### FURNACE

Cleaning and calibrating your furnace insures its best performance.

2

### AIR CONDITIONING

Heat and cool transfer is greatly increased when your coils are clean.

3

### COMBINATION

We service your AC in the Spring and furnace in the Fall.

### Lower Utility Bills

Dirty units run longer and cost more.

### Maintain Warranty

Help prevent being denied a warranty claim.

### We Call To Schedule

Worry free, we take care of everything for you.

## What are you really getting?

There is a difference between a simple check up and a precision tune up.

A check up is just to look over everything and find an opportunity to sell something to the customer. At Custom Climate Professionals we do a **precision tune up**.

When servicing the furnace we perform a **Safety Sequence Check**, clean the **Flame Sensing Rod**, balance the **Blower Wheel**, clean the **Blower Motor**, perform a **Gas Pressure Analysis**, test for **Gas Leaks**, evaluate the **Temp Rise**, detect the presence of **Carbon Monoxide** and determine **Amp Draws** on the inducer **Draft Motor** and the **Blower Motor**. What this means is we take the system apart and inspect all of the components and adjust them to function at their *highest efficiency*.

During a A/C precision tune up, we do a **Chemical Coil Cleaning** on the inside and outside coil, analyze your systems **Static Pressure**, check **Refrigerant Levels**, test run **Capacitors**, check **Amp Draws** on contactors and lubricate **Fan Bearings**. In other words all of the things that maintain maximum efficiency of your equipment.

**“Great company, my preferred company for my AC and Heating needs” - Joe Z**

*Not only will these services insure the longest life possible for your furnace and air conditioner, they will save you money on utility bills.*

- You will never have an overtime charge
- 10% discount off any repair
- 5% off any new equipment purchase
- Fully transferable

	① FURNACE	② AIR CONDITIONING	③ COMBINATION
One Year	169	169	315
Two Year	315	315	600
Three Year	440	440	825
